National Ceramic Tile and Stone

Subject: Thank You!

Christena,

I'd like to take this opportunity to thank you for NCTS's exceptional performance on the Roseville District Office project. Please express my gratitude to all of the project personnel and those from your office who supported them. From the beginning, your team brought valuable information to our team related to schedule to ensure project schedule was accurate to make this a successful project, always available and willing to offer your expertise to help keep the project moving forward. Tony was also key to the success of this project as he truly understand what quality work and teamwork looks like. Thanks also for being flexible with our team and jumping on all issues right away and being very attentive to the project site... a sign of a true partner wanting the project to keep moving forward. You rock! We are truly grateful that you have chosen to work with Flint and we look forward to working together again in the near future.

Sincerely,

Joe Windmiller
Project Manager, Flint Builders
